

Schedule and manage all your equipment and jobs in one place.

#### Flexible for all sizes of business

The Equipment Management and Tracking Add-On is designed for rental houses, production companies, broadcasters and universities – anyone who needs to keep an eye on all their equipment. Check equipment in and out with barcode/QR scanning, track lost or broken kit, and keep a history of what's been where and when.

#### The full picture

- View a Gantt-style calendar overview of your current jobs with a clear overview of availability of your main equipment.
- Create and manage equipment kits, including what is under maintenance.

- Build quotes and send invoices before or at the same time as you are booking the equipment.
- Dispatch the equipment directly from the Booking and assign pick up contacts that are notified when the Dispatch is ready to be picked up.
- Send automated email notifications to crew and clients.
- Easily see the status (In, Out, On Maintenance) and “movement” of equipment.
- Keep track of objects or kits out for repair or lost, with a full history of the activity.
- Send email notifications on overdue Check-outs that have to be returned.
- Swap equipment when scanning with items of the same kind.
- A separate record for each item is created, showing purchase date and amount, current location, serial and model numbers, value, etc

#### Track equipment with barcode scanning

- Inventorize your equipment with inventory numbers to create barcode or QR codes
- Inventory numbers can be associated with individual items or kits.
- Scan the equipment as it is checked out or comes back.

*“We could not run Electra without the object manager in farmerswife. Thousands of items for rent, easily viewed, booked and managed with a single click, drag & drop.”*

- ELECTRA
