Tired of creating your budgets and quotes on separate spreadsheets and not being able to easily compare your actuals? farmers**wife** can help!

With the farmers**wife** Budgeting add-on, you can create customised budgets and quotes, keep a real-time check on quoted vs actuals and generate reports to analyse your project forecast and results.

An effective project budget management tool
With budgeting add-on you can:

- Plan and manage your project budgets with ease.
- Create multiple quotes for different scenarios in one project.
- Create a final budget for each project and track it against actuals and expenses.
- Lock your budgets, once they are approved.
- Create and save budget templates to easily re-use them in the future.
- Analyse financial performance in a practical way that drives better decisions.
- Compare the budget to your actuals as well and look at the forecast.
- Get a real-time overview of your production.
- Create quotes based on your actuals.
- Track every minute worked by logging both actual and billable time spent on projects and see when you are over the budget.

With the budgeting module you can also run comprehensive financial analysis– comparing budgeted, booked, used and invoiced. Monitoring the spending provides better control over your projects and allows you to make better decisions!

"Extensive Budgets are created before the project starts and time reporting allows more accurate cost tracking against actuals."

- FILMMORE
